

Electric Beverage Chiller

Product Bulletin

November 2006

Description

The Electric Beverage Chiller uses recirculating forced air to keep beverages cold and ensures a fast pull down time.

- Has 3 separate sections for storing products
- Includes "Ice Topper" for displaying contents
- Changeable Graphics
- 3 changeable labels (one for each section)
- low cost versus other single door coolers
- Set on 4 casters - mobility for target, "zonal" placements
- Lightweight, sturdy design & easy setup
- Energy efficient operation
- Fully insulated and operates freon-free
- Has quiet "brushless motor"
- Flexible graphic change options for targeting specific brand or for effecting retailer or for co-branding initiatives
